

# LABORATORY OBSERVATION

**Course:** Full Stack Web Development

**Course Code:** 23CM4121

**Experiment No.:** 1

**Student Name:** R.S.V.R.Prasad

**Roll No.:** A24126552266

**Date:** 25-08-2026

---

## 1. TITLE:

Create a webpage titled College Information Portal Using html components

---

## 2. AIM:

To Create a webpage named as "College Information Portal" using html elements.

---

## 3. OBJECTIVE:

To design and develop a static webpage titled "College Information Portal" using HTML, in order to:

1. Understand and apply the basic structure of an HTML document (<html>, <head>, <body> tags).
  2. Learn to use appropriate HTML tags to organize and present institutional/college-related information in a structured, readable format.
  3. Gain hands-on experience with common HTML elements such as headings, paragraphs, lists, tables, images, hyperlinks, and forms (as applicable to the portal's content).
  4. Understand how semantic and structural tags contribute to a well-organized webpage layout.
  5. Develop familiarity with saving, running, and viewing an HTML file in a web browser.
- 

## 4. THEORY:

**HTML (Hyper Text Markup Language)** is the standard markup language used to create and structure content on the web. It is not a programming language but a **markup language** — it uses a system of tags to define the structure and meaning of content, which web browsers then interpret and render visually.

---

## 5. ALGORITHM / PROCEDURE:

1. Start
2. Declare `<!doctype html>` and begin the `<html>` element with `lang="en"`
3. Within the `<head>` section:
  - Set character encoding using `<meta charset="UTF-8">`
  - Set the viewport meta tag for responsive scaling
  - Set the `<title>` of the page as "clg information portal"
4. Begin the `<body>` section
5. Create a `<header>` block containing:
  - A main heading (`<h1>`)
  - A `<nav>` with an unordered list (`<ul>/<li>`) of anchor links (`<a href="#part1">`, `#part2`, `#part3`, `#part4`) pointing to different sections of the page
6. Create the College Information section (`id="part1"`):
  - Add a heading (`<h1>`)
  - Add a paragraph demonstrating text formatting tags: `<b>`, `<i>`, `<u>`, `<sup>`, `<sub>`
  - Add an ordered list (`<ol>/<li>`) and an unordered list (`<ul>/<li>`)
7. Create a Links section:
  - Add a heading (`<h1>`)
  - Add two paragraphs each containing a hyperlink (`<a href="...">`) to external websites
8. Create the Table section (`id="part2"`):
  - Build a `<table>` with `border="1"`
  - Add a `<thead>` with column headers (`<th>`) for Roll No, Name, Branch, Email
  - Add a `<tbody>` with a data row (`<tr>/<td>`) containing student details
9. Create the Logo section:
  - Add a heading (`<h1>`)
  - Insert an `<img>` tag with `src` (external image URL) and `alt` attribute
10. Create the Form section (`id="part3"`):
  - Add a heading (`<h1>`)
  - Begin a `<form>` element
  - Add labeled text input for name (`<input type="text">`)
  - Add labeled email input (`<input type="email">`)

- Add labeled password input (<input type="password">)
- Add two radio buttons for gender selection (<input type="radio">)
- Add two checkboxes for hobbies, one pre-checked using checked (<input type="checkbox">)
- Add a dropdown (<select>/<option>) for branch selection
- Add a <textarea> for comments
- Add submit and reset buttons (<input type="submit">, <input type="reset">)

**11. Create the Reviews section (id="part4") using semantic tags:**

- Wrap content in a <section>
- Add a heading (<h1>)
- Use an <article> containing a sub-heading (<h2>) and a paragraph review

**12. Create the Video section:**

- Add a heading (<h1>)
- Insert a <video> element with width, controls attribute, and a nested <source> tag (src, type)

**13. Create the Audio section:**

- Add a heading (<h1>)
- Insert an <audio> element with controls attribute and a nested <source> tag

**14. Create the HTML5 Input Types section:**

- Add a heading (<h1>)
- Add labeled inputs demonstrating HTML5 input types: email, date, number, color, range

**15. Create a <footer> element (id="Contact", class="site-footer"):**

- Add a copyright paragraph

**16. Link an external JavaScript file using <script src="script.js"></script> just before closing </body>**

**17. Close </body> and </html>**

**18. Save the file with a .html extension**

**19. Open the file in a web browser to view rendered output**

**20. Stop**

---

## 6. Program:

```
1  <!doctype html>
2  <html lang="en">
3
4  <head>
5      <meta charset="UTF-8" />
6      <meta name="viewport" content="width=device-width, initial-scale=1.0" />
7      <title>clg information portal</title>
8  </head>
9  |
10 <body>
11
12     <header>
13         <h1>this is header</h1>
14         <nav>
15             <ul>
16                 <li><a href="#part1">College Information Portal</a></li>
17                 <li><a href="#part2">Tables and Images</a></li>
18                 <li><a href="#part3">Forms</a></li>
19                 <li><a href="#part4">HTML5 Features</a></li>
20             </ul>
21         </nav>
22     </header>
23
24     <h1 id="part1">this is college information</h1>
25     <p>
26         <b>Lorem.</b> <i>ipsum</i> <u>dolor</u> <sup>sit</sup> <sub>amet</sub>
27     </p>
28
29     <li>
30         <ol>
31             <li>this is ol list</li>
32         </ol>
33         <ul>
34             <li>this is ul list</li>
35         </ul>
36     </li>

## 7. CODE EXPLANATION:

| <u>Code</u>                         | <u>Explanation</u>                                                            |
|-------------------------------------|-------------------------------------------------------------------------------|
| <u>&lt;!doctype html&gt;</u>        | <u>Declares the document as HTML5 to the browser.</u>                         |
| <u>&lt;html lang="en"&gt;</u>       | <u>Root element of the page; lang specifies the page language as English.</u> |
| <u>&lt;meta charset="UTF-8"&gt;</u> | <u>Sets the character encoding so text/symbols display correctly.</u>         |
| <u>&lt;meta name="viewport"&gt;</u> | <u>Controls how the page scales on different screen sizes/devices.</u>        |

|                                                                |                                                                                                                                                                    |
|----------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <u>&lt;title&gt;</u>                                           | <u>Sets the text shown on the browser tab.</u>                                                                                                                     |
| <u>&lt;header&gt;</u>                                          | <u>Defines the top introductory section of the page.</u>                                                                                                           |
| <u>&lt;ul&gt; / &lt;ol&gt; / &lt;li&gt;</u>                    | <u>Create unordered, ordered, and list-item elements respectively.</u>                                                                                             |
| <u>&lt;nav&gt;</u>                                             | <u>Marks a block of navigation links.</u>                                                                                                                          |
| <u>&lt;a href=""&gt;</u>                                       | <u>Creates a hyperlink; href specifies the destination URL or page section.</u>                                                                                    |
| <u>&lt;table&gt;</u>                                           | <u>Creates a table structure.</u>                                                                                                                                  |
| <u>&lt;img src="" alt=""&gt;</u>                               | <u>Embeds an image; src gives the image path/URL, alt gives fallback/accessibility text.</u>                                                                       |
| <u>&lt;form&gt;(&lt;label for=""&gt;,&lt;input type=""&gt;</u> | <u>Creates a form to collect user input.</u><br><u>Displays text tied to a specific input field (for matches the input's id).</u><br><u>Creates a input field.</u> |
| <u>&lt;section&gt;</u>                                         | <u>Groups related content into a thematic block.</u>                                                                                                               |
| <u>&lt;footer&gt;</u>                                          | <u>Defines the bottom/closing section of the page.</u>                                                                                                             |
| <u>&lt;script src="script.js"&gt;</u>                          | <u>Links an external JavaScript file to add interactivity to the page.</u>                                                                                         |

## 7. TEST CASES AND EXECUTION DATA:

| <u>Test Case</u> | <u>Name</u>   | <u>Email</u> | <u>Branch</u> | <u>Status</u> |
|------------------|---------------|--------------|---------------|---------------|
| <u>1</u>         | <u>Satya</u>  | <u>266</u>   | <u>Csm</u>    | <u>Pass</u>   |
| <u>2</u>         | <u>Sravan</u> | <u>268</u>   | <u>Csm</u>    | <u>Pass</u>   |
| <u>3</u>         | <u>Somya</u>  | <u>258</u>   | <u>Csm</u>    | <u>Pass</u>   |
| <u>4</u>         | <u>Srikar</u> | <u>259</u>   | <u>Csm</u>    | <u>Pass</u>   |

## 10. RESULT

Thus, the webpage "**College Information Portal**" using html elements has been created.

---

### How this would be submitted:

My final submission would contain:

#### Source Code

Week-1/OBS-Task-1

|

|—— OBS\_TASK\_1 output.png

|—— OBS\_TASK\_1.html

|—— OBS\_TASK\_1.pdf

Containing:

**Title → Aim → Objective → Theory → Algorithm → Program → Code Explanation → Test Cases → Output Screenshots → Result**

---

### How I would score against your 10-mark rubric:

If I submitted exactly this, the faculty could evaluate it like this:

| Criterion                     | Maximum | Example Score |
|-------------------------------|---------|---------------|
| Aim & Objective               | 1       | 1             |
| Concept / Theory              | 2       | 2             |
| Algorithm / Procedure         | 1       | 1             |
| Source Code / Implementation  | 2       | 2             |
| Output & Result               | 2       | 2             |
| Analysis, Viva & Presentation | 2       | 2             |

|              |           |              |
|--------------|-----------|--------------|
| <b>Total</b> | <b>10</b> | <b>10/10</b> |
|--------------|-----------|--------------|
